# eMedication Project

# Key principles of Data Download

1

## Definition of Download

- Downloading of HCRs' data means receiving or transferring HCRs' data from eHRSS, through control system interfaces, to HCPs' local eMR systems

2

## Downloaded data shall become part of HCP's health records

- HCP should handle the data in accordance with its own data retention policy and PD(P)O (Cap 486)

3

## Use of downloaded data from eHRSS

- According to Part 3 of eHRSS Ordinance, data in eHR may be used only for
  - Healthcare
  - Disease control and surveillance
  - As permitted under any other law

4

## HCP who is eligible for Data Download

- Registered HCP in eHRSS
- With valid and justifiable needs
- Passed the system connection and security testing

# Before applying for Data Download in eHRSS

## eHealth Registration

- eHealth HCP registration
- Sharing consent given by HCRs

## Proposal for data download

- Detailed descriptions of the proposed services
  - ◆ expected number of HCRs involved
  - ◆ benefits of its service to HCRs concerned
  - ◆ impacts if such requests were being rejected
  - ◆ Etc...
- Notification to HCRs of the downloading

## Privacy related policies

- Data retention policy
- Formal data breach handling and notification policy

## System Security and other preparation procedures

- System checking and analysis according to security requirements
- Ensure regular monitoring and audit on system behavior
- Perform periodic security assessment as requested
